***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-25, drawn to a method for extracting nucleic acids from a liquid mixture.

Group II, claim(s) 26-31, drawn to an extraction device.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The device of claim 26 was known in the art prior to the filing of the instant application. As seen at page 81 of *Stratagene Cloning Systems 1993 Catalog*, a "Poly(A) Quick® mRNA Isolation Kit" was offered for sale and that the kit comprised "Poly(A) Quick® push columns" that are described as being connected to a syringe when used. Such a showing fairly anticipates the invention of claim 26. While the invention are linked through the device, the device does not qualify as a special technical feature so as to impart unity of invention under PCT Rule 13.1.

3. A telephone call was made to Kathleen D. Rigaut, Ph.D., Reg. No. 43,047, on 21 July 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley L. Sisson whose telephone number is (703) 308-3978. The examiner can normally be reached on 6:30 a.m. to 5 p.m., Monday through Thursday.
